

## **Numbers | Letters | Consonants | Vowels**

All numbers and letters have a positive and negative potential in energy. If a person is highly evolved, he uses the higher values and the higher degrees of the letters and numbers. When a person is of lesser degrees of evolvment, he expresses the negative tone-value in the vowels and consonants.

In dreaming of numbers, one should add the numbers e.g., the number 356 would be added  $3+5+6=14$ . Fourteen is ruled by Neptune. The number 14 can also mean a period of 14 days.

One should gauge what is being said in a numerical dream by weighing the accompanying symbols connected with the numbers. Should he add the numbers 1 and 4, this would indicate the fifth month, or May, or may indicate the fifth day of the week, Friday.

**Consonants** - all consonants contain physical-action energies.
